THE TIMES MONDAY MAY 11 1987

Smallpox vaccine 'triggered Aids virus'

By Pearce Wright, Science Editor

The Aids epidemic may have been triggered by the mass vaccination campaign which eradicated smallpox.

The World Health Organization, which masterminded the 13-year campaign, is studying new scientific evidence suggesting that immunization with the smallpox vaccine *Vaccinia* awakened the unsuspected, dormant human immuno defence virus infection (HIV).

Some experts fear that in obliterating one disease, another disease was transformed from a minor endemic illness of the Third World into the current pandemic.

While doctors now accept that *Vaccinia* can activate other viruses, they are divided about whether it was the main catalyst to the Aids epidemic.

But an adviser to WHO who disclosed the problem, told *The Times*: "I thought it was just a coincidence until we studied the latest findings about the reactions which can be caused by *Vaccinia*. Now I believe the smallpox vaccine theory is the explanation to the explosion of Aids."

6 In obliterating one disease, another was transformed 9

Further evidence comes from the Walter Reed Army Medical Centre in Washington.

While smallpox vaccine is no longer kept for public health purposes, new recruits to the American armed services are immunized as a precaution against possible biological warfare. Routine vaccination of a 19-year-old recruit was the trigger for stimulation of dormant HIV virus into Aids.

This discovery of how people with subclinical HIV infection are at risk of rapid development of Aids as a vaccine-induced disease was made by a medical team working with Dr Robert Redfield at Walter Reed.

The recruit who developed Aids after vaccination had been healthy throughout high school. He was given multiple immunizations, followed by his first smallpox vaccination.

Two and a half weeks later he developed fever, headaches, neck stiffness and night sweats. Three weeks later he was admitted to Walter Reed suffering from meningitis and rapidly developed further symptoms of Aids and died after responding for a short time to treatment.

There was no evidence that the recruit had been involved in any homosexual activity.

In describing their discovery in a paper published in the *New England Journal of Medicine* a fortnight ago, the Walter Reed team gave a warning against a plan to use modified versions of the smallpox vaccine to combat other diseases in developing countries.

Other doctors who accept the connection between the anti-smallpox campaign and the Aids epidemic now see answers to questions which had baffled them. How, for instance, the Aids organism, previously regarded by scientists as "weak, slow and vulnerable", began to behave like a type capable of creating a plague.

Many experts are reluctant to support the theory publicly because they believe it would be interpreted unfairly as criticism of WHO.

Continued on page 18, col 7

Aids epidemic 'triggered by smallpox vaccine'

Continued from page 1

In addition, they are concerned about the impact on other public health campaigns with vaccines, such as against diptheria and the continued use of *Vaccinia* in potential Aids research.

The coincidence between the anti-smallpox campaign and the rise of Aids was discussed privately last year by experts at WHO. The possibility was dismissed on grounds of unsatisfactory evidence.

Advisors to the organization believed then that too much attention was being focussed on Aids by the media. It is now felt that doubts would have risen sooner if public health authorities in Africa had more willingly reported infection statistics to WHO.

Instead, some African countries continued to ignore the existence of Aids even after US doctors alerted the world when the infection spread to the United States.

However, as epidemiologists gleaned more information about Aids from reluctant Central African countries, clues began to emerge from the new findings when examined against the wealth of detail known about smallpox as recorded in the *Final Report of the Global Commission for the Certification of Smallpox Eradication.*

The smallpox vaccine theory would account for the position of each of the seven Central African states which top the league table of most-affected countries; why Brazil became the most afflicted Latin American country; and how Haiti became the route for the spread of Aids to the US.

It also provides an explanation of how the infection was spread more evenly between males and females in Africa than in the West and why there is less sign of infection among five to 11-year-olds in Central Africa.

Although no detailed figures are available, WHO information indicated that the Aids league table of Central Africa matches the concentration of vaccinations.

The greatest spread of HIV infection coincides with the most intense immunization programmes, with the number of people immunized being as follows:

Zaire 36,878,000; Zambia 19,060,000; Tanzania 14,972,000; Uganda 11,616,000; Malawai 8,118,000; Ruanda 3,382,000 and Burundi 3,274,000.

Brazil, the only South American country covered in the eradication campaign, has the highest incidence of Aids in that region.

About 14,000 Haitians, on United Nations secondment to Central Africa, were covered in the campaign. They began to return home at a time when Haiti had become a popular playground for San Francisco homesexuals.

Dr Robert Gello, who first identified the Aids virus in the US, told *The Times:* "The link between the WHO programme and the epidemic in Africa is an interesting and important hypothesis. "I cannot say that it actually happened, but I have been saying for some years that the use of live vaccines such as that used for smallpox can activate a dormant infection such as HIV.

"No blame can be attached to WHO, but if the hypothesis is correct it is a tragic situation and a warning that we cannot ignore."

Charity and health workers are convinced that millions of new Aids cases are about to hit southern Africa.

After a meeting of 50 experts near Geneva this month it was revealed that up to 75 million, one third of the population, could have the disease within the next five years.

Some organizations which have closely studied Africa, such as War on Want, believe that South Africa's black population, so far largely protected from the disease, could be most affected as migrant workers bring it into the country from the worst hit areas further north.

The apartheid policy, they predict, will intensify its outbreak by confining the groups into comparatively small, highly populated towns where it will be almost impossible to contain its spread.

Aids was first officially reported from San Francisco in 1981 and it was about two years later before Central African states were implicated. It is now known that these states had become a reservoir of Aids as long ago as the late 1970s.

Although detailed figures of Aids cases in Africa are difficult to collect, the more than two million carriers, and 50,000 deaths, estimated by the World Health Organization are concentrated in the countries where the smallpox immunization programme was most intensive.

The 13-year eradication campaign ended in 1980 with the saving of two million lives a year and 15 million infections. The global saving from eradication has been put at $1,000 million a year.

A.I.D.S.:

The United States's Secret Germ Warfare Program to Exterminate BLACKS

In Africa, America, Haiti, Brazil! Now Try to Say It's Commy Plot.

Beginning in the mid-1970s, the IMF and its sister institution, the World Bank, designated huge areas of the developing sector, including most of the middle section of Africa around Zaire, as the "Fourth World." The intent was simple: to kill off millions of people whom the international bankers had decided constituted "excess population" and "useless eaters through the simple expedients of starvation and disease. (AIDS)

There is a growing mass of scientific data and medical studies indicating that the AIDS virus can be directly traced to the very zone in Africa targeted by the International Monetary Fund ten years ago for development-project cancellation, brutal austerity, and credit cut-off. In other words, the AIDS epidemic which has taken the life of 7,000 Americans so far, and could conceivably wipe out every U.S. man, woman, and child by 1991, was caused by the African austerity policies of the IMF.

National Democratic Policy Commity.

WHY? "Because of varing degrees of dependence on imports for the maintenance of optimum industrial capacity on the part of the Western (white) nations, the marked (•) 25 minerals amoung 54 produced in Southern Africa can be regarder as minerals of Strategic Importance. In other words, under the Westeven system of politics, religon, economics, etc., the value of the Black man, Black woman and Black child has in their eyes dropped lower then the price of iron ore, copper or sand."

How, you wonder, does the disease AIDS of today, purported homosexual, evidence an attack on the Africans (Blacks) by the world virologists and bureaucrats? In documents available in medical libraries virologists and bureaucrats request the production of AIDS virus and plan its introduction to various poplulations of world during preventive vaccinations.

THE PLAN

In Volume 47 of the Bulletin of the World Health Organizati pages 257 through 274 (1972), we find A. C. Allison with others including WHO officals and an NIH bureaucrat recommend at page 2

> (1) A systematic evaluation of the effects of viruses on immune functions should be undertaken. A number of viruses should be studied and a standard set of immune functions should be employed. Amoung the factors that deserve investigation are antigen types (e.g., thymus-dependant vs. non-thymus dependant), antigen dose, and the time relationship between infection and antigen administration.
>
> (2) The effects of virus infection on different cell types (e.g., macrophages, T and B lymphocytes) should be studied in greater detail with morphological changes perhaps serving as an indication of functional alteration. Since differences in terminology often make it difficult to assess reports of pathological changes in lymphoid tissue, all modifications of the lymphoid organs should be described according to standardized criteria. Efforts at standardization are currently being supported by the World Health Organization.
>
> (3) An attempt should be made to ascertain whether viruses can in fact exert selective effects on immune function, e.g., by depressing 7S vs 19S antibody, or by affecting T cell function as opposed to B cell function (Allison et. al., 1972). The possibility should also be looked into that the immune response to the virus itself may be impaired if the infecting virus damages more or less selectively the cells responding to the viral antigens....

Thus, AIDS today is the disease the possibility of which was be looked into" in 1972, because in AIDS the immune response to th virus is impaired when a portion of the cells responding to the vi antigens are the infected cells which are killed, "lysed" in virologists terms, by the viral antigen.(38) LET THERE BE NO QUES THAT INFECTION WAS INTENDED BECAUSE A PART OF THE STUDY WAS TO BE TIME RELATIONSHIP BETWEEN INFECTION AND ANTIGEN ADMINISTRATION.

How was the study to be conducted in humans? The Fogerty International Center Proceedings No. 15 published in Federation Proceedings, Vol. 31, No. 3, May-June 1972, reports the proceeding a workshop held at the National Institute of Health, Bethesda, Maryland, July 27-30, 1970.(7) The committee for the conference w sponsored by the John E. Fogerty International Center for Advanced Study in the Health Sciences and the World Health Organization. A that conference in a histocompatability workshop, D. B. Amos of Du University with other allegedly independant scientists and bureaucrats, who in fact were and are dependant upon United States government grants to further their research, suggested at page 110

> In relation to the immune response, a number of useful experimental approaches can be visualized. One would be a study of the relationship of HL-A type to the immune response, both humoral and cellular, to well defined bacteria and viral antigens during preventive vaccinations. This approach would be particularly informative when applied to sibships.

I assume by "well defined" they meant well know. I further assume that by "sibships" they meant children of the same parents.

Therefore, it is clear that WHO and the NIH decided in 1970 to inject known virus and bacteria into children of the same parents during allegedly preventive vaccinations to study HL-A type. Then 1972, the WHO Bulletin changed the study to a study of virus which cause a depression in immune function. I repeat, LET THERE BE NO QUESTION THAT INFECTION WAS INTENDED BECAUSE A PART OF THE STUDY WA TO BE THE TIME RELATIONSHIP BETWEEN INFECTION AND ANTIGEN ADMINISTRATION.

All their planning would be worthless without willing bodies t do the work. The evidence of the bodies is provided by the Seventh National Cancer Conference Proceedings, sponsored by the American Cancer Society, Inc., and the United States National Cancer Institu published by the J. B. Lippencott Company, Philadelphia and Toronto (1972)".(8) It contains the report on epidemology by John Higginson M.D., director of the International Agency for Research on Cancer, Lyon, France, and a map on page 681 indicating the world wide distribution of that agency's programs. It is important that we remember that the date of the map is 1972, as we read the words of Doctor Higginson at page 680:

> ....The complex biology of cancer makes it essential to approach observational studies in man with the same technical sophistication that characterizes animal experimentation. Thus, the Governing and Scientific Councils decided that the Agency's epidemiological studies should be fully integrated with recent developments in laboratory research and that a multidisciplinary team approach was essential to insure that the Agency would make full use of its unique international situation. The mere collection of numerical data --"nose-counting"--is of no value per se, and descriptive epidemiology is only one of many disciplines concerned in the study of cancer causation. (Emphasis added.)

Of course, descriptive epidemiology is merely the collection a analysis of numerical data. On the other hand the "technical sophistication that characterizes animal experimentation" involves innoculation of disease into the research animals.

All we need to do to see the relationship between the "Governir and Scientific Councils," innoculation of disease, the AIDS virus, its related retroviruses is pencil in the homosexual cohorts from t Hepatitus B vaccine study reported in the Annals of Internal Medicine, Vol. 97, No. 3, (1982) pages 362-369,(31) on the map on pa 681 of the Seventh National Conference Proceedings, (8) and we have marked the retrovirus concentrations of the world as now known. The St. Louis and Chicago cohorts of the Hepatitus B studies may have served as controls or got a dose of a slower acting cancer inducer like HTLV-I or HTLV-II.

Smallpox vaccine 'triggered Aids virus'

By Pearce Wright, Science Editor

The Aids epidemic may have been triggered by the mass vaccination campaign which eradicated smallpox.

The World Health Organization, which masterminded the 13-year campaign, is studying new scientific evidence suggesting that immunization with the smallpox vaccine Vaccinia awakened the unwanted, dormant human immune defence virus infection (HIV).

Some experts fear that in obliterating one disease, another disease was transformed from a minor endemic illness of the Third World into the current pandemic.

While doctors now accept that Vaccinia can activate other viruses, they are divided about whether it was the chief catalyst to the Aids epidemic.

But an adviser to WHO who disclosed the problem, told *The Times*: "I thought it was just a coincidence until we studied the latest findings about the reactions which can be caused by Vaccinia. Now I believe the smallpox vaccine theory is the explanation to the explosion of Aids."

6 In obliterating one disease, another was transformed 9

It also provides an explanation of how the infection was spread more evenly between males and females in Africa than in the West and why there is less sign of infection among five to 9-year-olds in Central Africa.

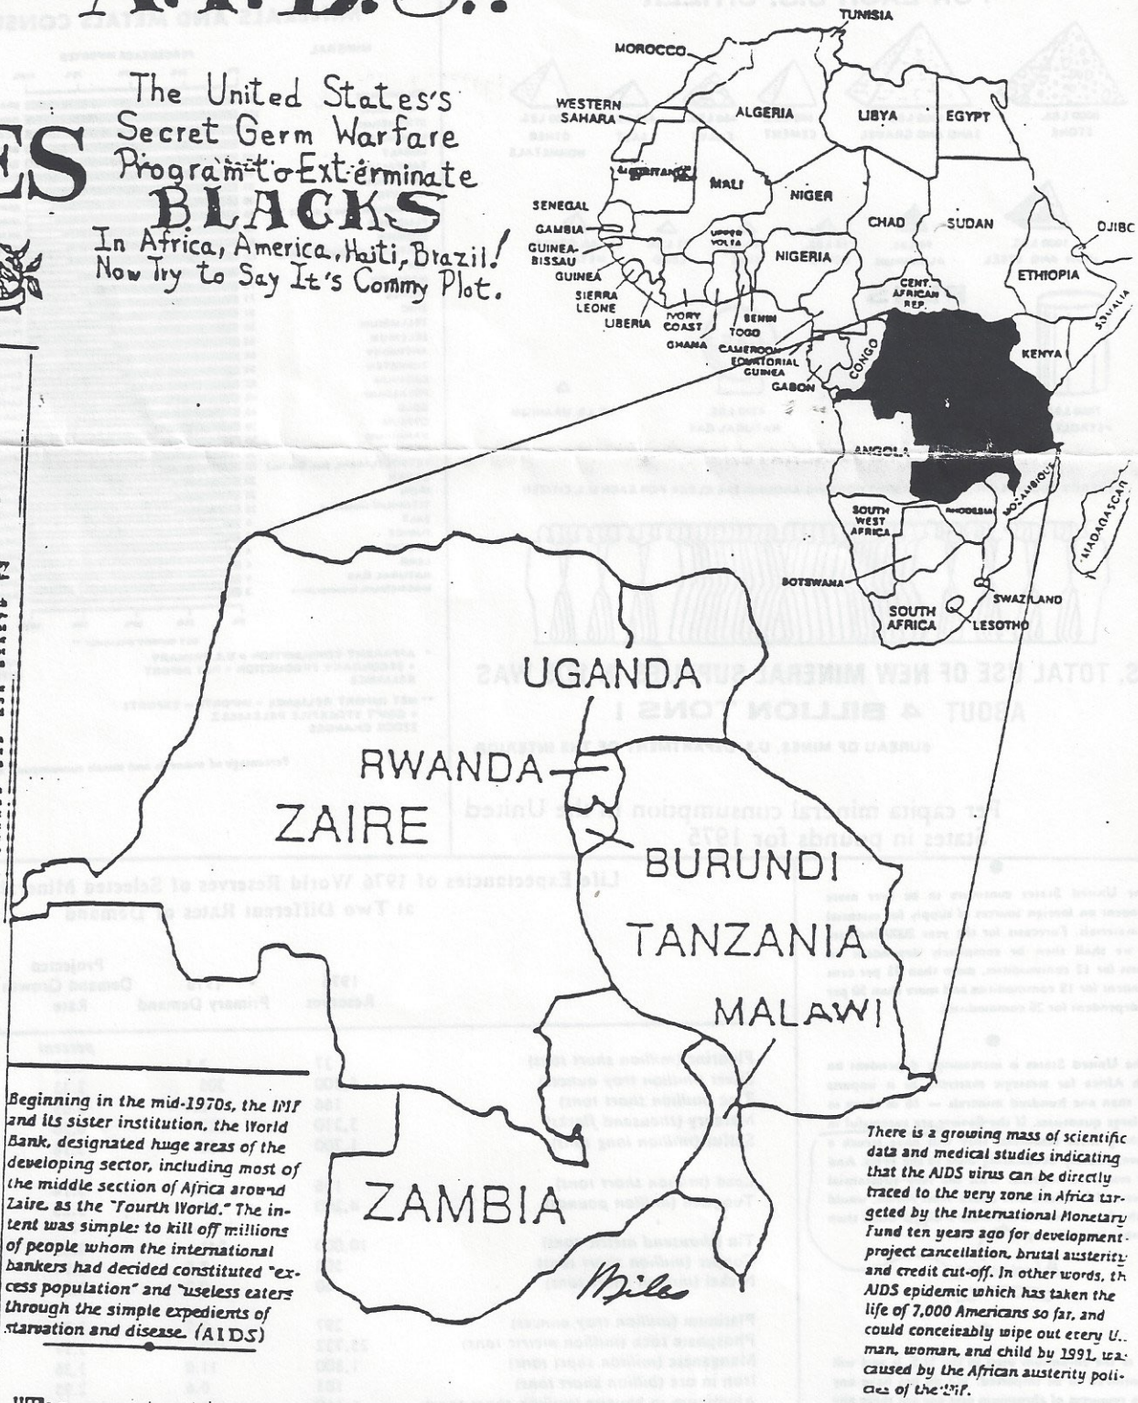
Although no detailed figures are available, WHO information indicated that the Aids league table of Central Africa matches the concentration of vaccinations.

The greatest spread of HIV infection coincides with the most intense immunization programmes, with the number of people immunized being as follows:

Zaire 36,878,000; Zambia 19,060,000; Tanzania 14,972,000; Uganda 11,616,000; Malawai 8,118,000; Ruanda 3,382,000 and Burundi 3,274,000.

Brazil, the only South American country covered in the eradication campaign, has the highest incidence of Aids in that region.

About 14,000 Haitians, on United Nations secondment to Central Africa, were covered in the campaign. They began to return home at a time when Haiti had become a popular playground for San Francisco homosexuals.



Beginning in the mid-1970s, the IMF and its sister institution, the World Bank, designated huge areas of the developing sector, including most of the middle section of Africa around Zaire, as the "Fourth World." The intent was simple: to kill off millions of people whom the international bankers had decided constituted "excess population" and "useless eaters through the simple expedients of starvation and disease. (AIDS)

There is a growing mass of scientific data and medical studies indicating that the AIDS virus can be directly traced to the very zone in Africa targeted by the International Monetary Fund ten years ago for development-project cancellation, brutal austerity and credit cut-off. In other words, the AIDS epidemic which has taken the life of 7,000 Americans so far, and could conceivably wipe out every w... man, woman, and child by 1991, was caused by the African austerity policies of the IMF.

"The geratest spread of HIV infection coincides with the most intense immunization programs of the World Health Organization, with the number of people immunized being as follows:

Country	Injected	% Pop.	% Christians	Resource(s)
Zaire:	36,878,000	(100%)	70%	Diamonds, Cadmium, Chromite, Tantalite, Copper, Germanium, Tin, Cobalt(60%), Gold, Silver, Zinc, Iron, Manganese, Uranium, Radium, Crude oil, Forests, Rubber, Ivory.
Zambia	19,060,000	(100%)	21%	Beryllium, Cobalt, Copper, Zinc, Gold, Lead, Vanadium, Manganese, Coal, Rubber, Ivory.
Tanzania	14,972,000	(75%)	35%	Diamonds, Gold, Nickel, Hides.

BUREAU OF MINES, U.S. DEPARTMENT OF THE INTERIOR (import-export data from Bureau of the Census)

Percentage of minerals and metals consumption supplied by U.S. imports in 1975 (13).

The United States continues to be ever more dependent on foreign sources of supply for essential raw materials. Forecasts for the year 2000 indicate that we shall then be completely dependent on imports for 12 commodities, more than 75 per cent dependent for 19 commodities and more than 50 per cent dependent for 26 commodities.

●

The United States is increasingly dependent on South Africa for strategic materials as it imports more than one hundred minerals — 16 of them in very large quantities. If the Soviets are successful in attaching these resources, they will have struck a massive, possibly devastating blow to the West. And these resources, together with the very substantial resources of Rhodesia and South West Africa, would give the Soviet-combination order a bigger boost than any other in its history.

Africans

●

All of the chromium used in the U.S. is and will continued to be imported. We do not have any own resources of chromium ores nor are there any substitute materials available for chromium. Sixty-five per cent of the chromium used is in metallurgical applications. It is an essential ingredient in stainless steels, and in high-temperature and corrosion resistant alloys. There are no satisfactory substitutes for chromium containing steels and alloys.

●

Europe has to reconsider not only its future policy towards the African continent and more particularly Southern Africa, but also its strategic interest in the field of raw materials as a whole, within the framework of its international relations. In the long run, the failure to bring about a conciliation of interests in this region would have the most serious consequences for the future.

●

Africa holds a leading position in the world, both in reserves and output of many kinds of raw materials. The deposits of some of the minerals in Africa are unique ... most of them concentrated in Southern Africa.[4]

●

From the perspectives of the 1970's, increasing our domestic supply of minerals seems imperative. A widespread misconception, however, allows that this is simply a matter of economics and technology — that the earth's crust is an infinite store-house that can readily be tapped for new supplies of all kinds of raw materials by either raising the price or developing new technology. If a mineral is not geologically available, favourable economics and technology are irrelevant. Raising the price may actually reduce the supply of a mineral commodity, because the higher price enables the company to mine a lower grade ore, thereby reducing the amount of concentrate derived from the same mill per unit of time. The use of increasingly lower grades of ore poses two major problems. First, more energy must be spent in second, the environmental impact is greater.

trategic Minerals of South Africa

Life Expectancies of 1976 World Reserves of Selected Mineral Commodities at Two Different Rates of Demand

	1976 Reserves	1976 Primary Demand	Projected Demand Growth Rate	Life Expectancy in Years[a] Static at 1976 Level	Life Expectancy in Years[a] Growing at Projected Rates
			percent		
Fluorine (*million short tons*)	37	2.1	4.58	18	13
Silver (*million troy ounces*)	6,100	305	2.33	20	17
Zinc (*million short tons*)	166	6.4	3.05	26	19
Mercury (*thousand flasks*)	5,210	239	0.50	22	21
Sulfur (*million long tons*)	1,700	50	3.16	34	23
Lead (*million short tons*)	136	3.7	3.14	37	25
Tungsten (*million pounds*)	4,200	81	3.26	52	31
Tin (*thousand metric tons*)	10,000	241	2.05	41	31
Copper (*million short tons*)	503	8.0	2.94	63	36
Nickel (*million short tons*)	60	0.7	2.94	86	43
Platinum (*million troy ounces*)	297	2.7	3.75	110	44
Phosphate rock (*million metric tons*)	25,732	107	5.17	240	51
Manganese (*million short tons*)	1,800	11.0	3.36	164	56
Iron in ore (*billion short tons*)	103	0.6	2.95	172	62
Aluminum in bauxite (*million short tons*)	5,610	18	4.29	312	63
Chromium (*million short tons*)	829	2.2	3.27	377	80
Potash (*million short tons*)	12,230	26	3.27	470	86

Note: Corresponding data for helium and industrial diamonds not available.

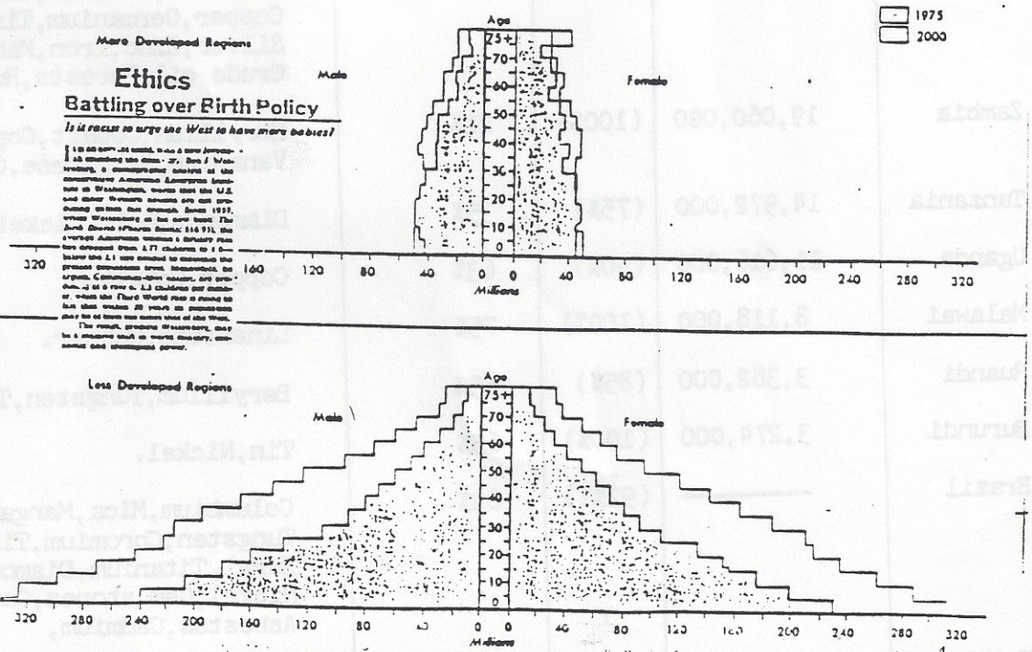
[a]Assumes no increase to 1976 reserves.

Source: After Global 2000 Technical Report, Table 12-4, but with updated and corrected entries. Updated reserves and demand data from U.S. Bureau of Mines, *Mineral Trends and Forecasts*, 1979. Projected demand growth rates are from Global 2000 Technical Report, Table 12-2.

Ethics

Battling over Birth Policy

Is it rascist to urge the West to have more babies?



Age-sex composition of the world's population, medium series, 1975 and 2000.

Good Times - Bad Times
Recession - Depression

Influence or Control of Money, Mail, Media, Military, IRS/Tax Courts, Commerce, Energy, Unions, Domestic and Foreign Policy, etc. Provides an Apparent Opportunity for Massive Fraud, Robbery, and Control of the American People!

NOTE: The "New World Order" views of Rockefeller, Kissinger, Brzezinski and others in the CFR/TC "inner circle" are not shared by all members. Some join for prestige and to further their careers. Some are invited in for "window dressing". All Americans should closely examine the disastrous results of foreign and domestic policy formulated and implemented by the CFR through the years without public knowledge.

RISE AND POWER OF THE INTERNATIONAL BANKERS

CHART PREPARED BY: REV. JAMES PATRICK, PASTOR, VICTORY BAPTIST CHURCH, 900-46th. Avenue East Moline, Illonois 61244 (20 January, 1975)

Continued from column one

1694
Wm. Paterson founder, Bank of England

Adam Weishaupt - Professor at the University of Ingelstadt

May 1, 1776 - Order of the Illuminati

1786-Raided by Bavarian authorities - Infiltrated the Masons

1789 - French Revolution

1. Abolish land ownership
2. Taxation of the people
3. Abolish all rights of inheritance
4. Confiscate lands and property of rebels
5. Centralize credit - Create National Banks
6. Control transportation and communication
7. State owned factories
8. Equal liability of all to labor
9. Distribution of the population
10. Free education for all in public schools

Note: Large Numbers indicate Progress to date

1795-1820 Rothschilds - Frankfort, Germany

1. Washington warned of the danger of the Illuminati
2. Jefferson wrote to John Adams stating that he agreed with him that the international bankers were more powerful and dangerous than standing armies.
3. Professor John Robison exposed it in his book, "PROOFS OF A CONSPIRACY"

1798

Rothschilds' five sons placed in the countries listed below and eventually each rose to great heights in power and control of these nations political and economic life.

5 SONS

Germany	Virginia Austro-Hungarian empire	England	Italy	France
Amschel Rothschild	Salomon Rothschild	Nathan Rothschild	Carl Rothschild	James Rothschild

Andrew Jackson abolished the central bank--If this measure had not been taken America would have fallen to the international bankers at this time.

1836

The Order of Illuminati resurfaced now known as:

LEAGUE OF JUST MEN
They hired
1848 - Karl Marx - Friedrich Engles to write
COMMUNIST MANIFESTO

1819-1900 - John Ruskin - Professor at Oxford taught that England's destiny was to Socialize the world, and extend its empire.

1853-1902 Cecil Rhodes - student of Ruskin set out to fulfill Ruskin's dreams

1860's

CIVIL WAR
Both North and South were financed by Rothschild

N. Rothschild — American agent for Rothschild
Stern Brothers — Relatives of Rothschilds

ROUNDTABLES

Feb. 5, 1891 Secret Society (Roundtables) were set up in the following countries for the express purpose of gaining control of the nations economic and political life. (Note, this movement was funded by Rothschild)

United States | Canada | Australia | India | South Africa | New Zealand

Milner emerged as the head of the Roundtables

AMERICA'S FINANCIAL STRUCTURE

CARNEGIE — **J.P. MORGAN**

Sen. Nelson Aldrich

KUHN—LOEB
America's most powerful international bank
Controlled by
1. Jacob Schiff (daughter-Frieda)
2. Solomon Loeb (daughter-Nina)

ROCKEFELLER
William Rockefeller
National City Bank
John D. Rockefeller
Chase Bank
(daughter-Abby)

Joined by Marriage

Paul Warburg
Manhattan Bank
CHASE-MANHATTEN BANK

(Note that it is important to know that Senator Nelson Aldrich worked with J.P. Morgan, and was a close friend of Paul Warburg Aldrich's daughter (Abby) Married J.D. Rockefeller. Thus by merger and marriage the three most powerful banking institutions were locked in with the international bankers of Europe)

1902 - The Warburgs
1. Max - Remained in Germany
2. Paul - Married Schiff's daughter (Frieda)
3. Felix - Married Loeb's daughter (Nina)

1907 - Panic caused by Morgan
This resulted in a cry for banking reform. Led by Senator Aldrich and Paul Warburg.

1910

NATIONAL MONETARY COMMISSION

Senator Nelson Aldrich appointed by the Senate to head the commission.

Secret meeting on Jekyl Island - Called by Senator Aldrich

Paul Warburg Manhattan Bank	Henry P. Dawson J.P. Morgan	Benjamin Strong J.P. Morgan

A. Platt Andrew, Ast. Secretary Treasury
F. Vanderlip, President of National City Bank

ALDRICH BILL defeated largely due to President Taft's objections

Election of 1912

Republican — President Wm. H. Taft
Progressive — Former Pres. Teddy Roosevelt - (Backed by Morgan)
Democratic — Woodrow Wilson - (Backed by Morgan & Rockefeller)

Col. Mandel House - A Socialist who had the support of Warburg, Morgan & Rockefeller became the most powerful man in Wilson's administration.

THREE MAIN OBJECTIVES

FEDERAL RESERVE ACT — Dec. 22, 1913

1. Paul Warburg and Benj. Strong served on the first Federal reserve Board.

1. Placed U.S. Treasury into private hands
2. Federal Reserve system - never audited
3. Controls Money supply
4. Controls Interest rates
5. Cause of inflation
6. Creates money out of nothing and then collects interest off of it.

5

Tasker H. Bliss

1. Security & Armaments
2. Economics & Financial problems
3. Political problems
4. Territorial problems

The CFR was organized for the express purpose of educating the American people to accept a One World Government.

(By 1939 the CFR had gained control of U.S. State Dept. Responsible for War effort)

1928 - Communist International sets plan to conquer world

1929 - Great Depression

1939 - World War II

1942 — Stalin lists 9 ways to destroy Capitalism

1945 - World War II ends

1945 - Yalta Conference (Eastern Europe surrendered to the Communists) Alger Hiss played a major role.

1945 - The United Nations

1. Socialize the economies of the world
2. Form regional governments
3. Bring the nations into a one world government
4. Confuse, disorganize - destroy Capitalism
5. Force advanced countries to pour out prolonged foreign aid to underdeveloped countries.
6. Divide peoples of the nations into Hostile groups
7. Encourage Government extravagance, Destroy Credit
Cause inflation
8. Ferment Strikes - Bring about a lenient attitude of government to disorders
9. Breakdown Moral virtues
10. Destroy faith in leaders.
11. Register firearms - Confiscate at all costs
12. Preach Democracy, but serve power.

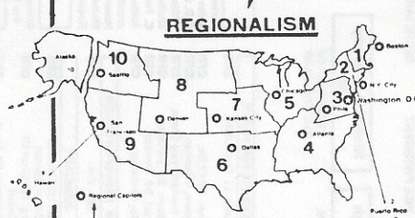
1968 - Assassination of Robert Kennedy

1968 - Elections
110 CFR Members Appointed

1969 - Executive order 11490

REGIONALISM



February 10, 1972 President Nixon signed executive order #11647. This created 10 regional areas over which regional councils were APPOINTED. All Revenue sharing passes through the hands of these appointed officials. It will only be a matter of time before the various states will be entangled in the web of Federal Finance. In doing so, the 50 States will loose their power to the regional government.

PENDING LEGISLATION

7 — 1. Agency for Consumer Advocacy
8 — 2. Equal rights Amendment

1&4 — 3. Land Use Bill
4. Gun Registration
